

Agenda 21 in One Easy Lesson

1 - Reduce world population to about 500 million.

2 - Collect those 500 million into tightly managed and controlled (stacked-and-packed) 'cities'.

3 - Make the majority of the world's land mass off-limits to all but the elite.

Awareness of Agenda 21 and Sustainable Development is racing across the nation as citizens in community after community are learning what their local council and city planners are actually up to. As awareness grows, many people complain that elected officials just won't read detailed reports or watch long videos. Here is something that is quick, and easy to read that we can hand out.

Do not allow this to be your only knowledge of this very complex subject. Research, know your details; discover the NGO players in your community; identify who is victimized by the policies and recruit them to your fight; and then kill Agenda 21. That's how it must be done. The information below is only your first step. Happy hunting.

What is Sustainable Development?

According to its authors, the objective of sustainable development is to integrate economic, social and environmental policies in order to achieve reduced consumption, social equity, and the preservation and restoration of biodiversity. Sustainablists insist that every societal decision be based on environmental impact, focusing on three components; global land use, global education, and global population control and reduction.

Social Equity (Social injustice)

Social justice is described as the right and opportunity of all people "to benefit equally from the resources afforded us by society and the environment." Redistribution of wealth. Private property is a social injustice since not everyone can build wealth from it. National

sovereignty is a social injustice. Universal health care is a social injustice. All part of Agenda 21 policy.

Economic Prosperity

Public Private Partnerships (PPP). Special dealings between government and certain, chosen corporations which get tax breaks, grants and the government's power to implement sustainable policy. Government-sanctioned monopolies.

Local Sustainable Development policies include

Smart Growth, Wildlands Project, Resilient Cities, Regional Visioning Projects, STAR Sustainable Communities, Green jobs, Green Building Codes, "Going Green," Alternative Energy, Local Visioning, facilitators, regional planning, historic preservation, conservation easements, development rights, sustainable farming, comprehensive planning, growth management, consensus.

Who is behind it?

Local Councils, Governments, Planning Councils, Planning Groups, aided by Mayors, Administrators and many private organizations and other government agencies. Foundation and government \$\$\$\$ grants drive the process. Remember, Governments and Local Councils are nothing more than private companies, a piece of paper with an abn number. It is the salaried individuals who will fine and tax you, restrict what you can do on your own land, and if you don't conform, they will confiscate your property and even jail you. Why - their jobs and their salaries are more important than you.

Where did it originate?

The term Sustainable Development was first introduced to the world in the pages a 1987

report (Our Common Future) produced by the United Nations World Commission on Environmental and Development, authored by Gro Harlem Brundtland, VP of the World Socialist Party. The term was first offered as official UN policy in 1992, in a document called UN Sustainable Development Agenda 21, issued at the UN's Earth Summit, today referred to simply as Agenda 21.

What gives Agenda 21 Ruling Authority?

More than 178 nations adopted Agenda 21 as official policy during a signing ceremony at the Earth Summit. US president George H.W. Bush signed the document for the US. In signing, each nation pledge to adopt the goals of Agenda 21. In 1995, President Bill Clinton, in compliance with Agenda 21, signed Executive Order #12858 to create the President's Council on Sustainable Development in order to "harmonize" environmental policy with UN directives as outlined in Agenda 21. The EO directed all agencies of the Federal Governments to work with state and local community governments in a joint effort "reinvent" government using the guidelines outlined in Agenda 21. As a result, Sustainable Development is now emerging as government policy in every town, county and state in the nation.

Revealing Quotes From the Planners

"Agenda 21 proposes an array of actions which are intended to be implemented by EVERY person on Earth...it calls for specific changes in the activities of ALL people... Effective execution of Agenda 21 will REQUIRE a profound reorientation of ALL humans, unlike anything the world has ever experienced..." Agenda 21: The Earth Summit Strategy to Save Our Planet (Earthpress, 1993). Emphases – DR

Agenda 21 and Private Property

"Land...cannot be treated as an ordinary asset, controlled by individuals and subject to the pressures and inefficiencies of the market. Private land ownership is also a principal instrument of accumulation and

concentration of wealth, therefore contributes to social injustice." From the report from the 1976 UN's Habitat I Conference. "Private land use decisions are often driven by strong economic incentives that result in several ecological and aesthetic consequences...The key to overcoming it is through public policy..." Report from the President's Council on Sustainable Development, page 112.

"Current lifestyles and consumption patterns of the affluent middle class – involving high meat intake, use of fossil fuels, appliances, home and work air conditioning, and suburban housing are not sustainable." Maurice Strong, Secretary General of the UN's Earth Summit, 1992. "Individual rights will have to take a back seat to the collective." Harvey Ruvin, Vice Chairman, ICLEI. The Wildlands Project

"We must make this place an insecure and inhospitable place for Capitalists and their projects – we must reclaim the roads and plowed lands, halt dam construction, tear down existing dams, free shackled rivers and return to wilderness millions of tens of millions of acres or presently settled land." Dave Foreman, Earth First.

What is not sustainable?

Ski runs, grazing of livestock, plowing of soil, building fences, industry, single family homes, paves and tarred roads, logging activities, dams and reservoirs, power line construction, and economic systems that fail to set proper value on the environment." UN's Biodiversity Assessment Report.

Hide Agenda 21's UN roots from the people

"Participating in a UN advocated planning process would very likely bring out many of the conspiracy- fixated groups and individuals in our society... This segment of our society who fear 'one-world government' and a UN invasion of the United States through which our individual freedom would be stripped away would actively work to defeat any elected official who joined 'the conspiracy' by undertaking LA21.
